

# ARTHREX® iBalance® UKA

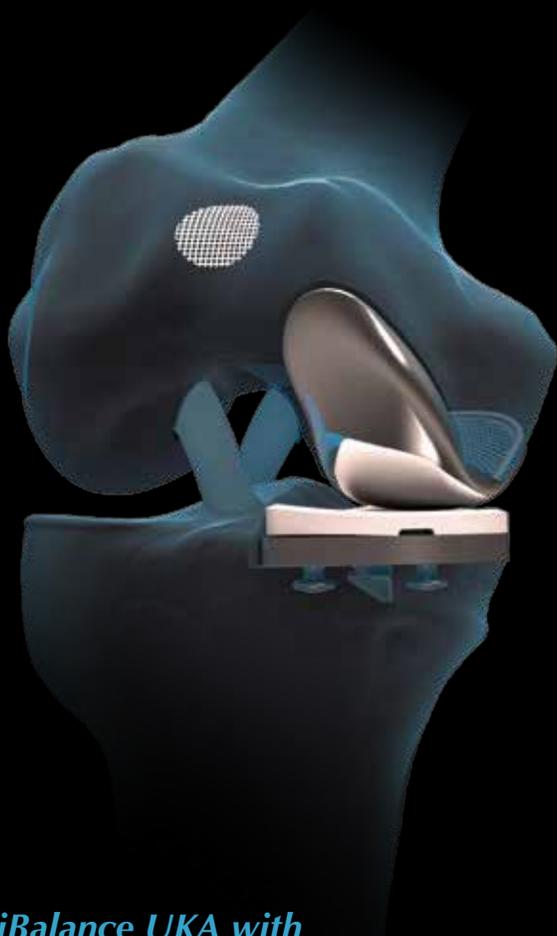

- Single radius femoral design ensures collateral tension throughout range-of-motion
- Equally applicable to resurfacing the medial or lateral compartment
- Patented fixation structures on both the femoral and tibial components contribute to anchoring of the implant
- Anchor-style keel improves conventional keel function through addressing anterior shear forces, in addition to providing rotational stability

- The low profile, efficient instrumentation platform exemplifies the key priorities that define success of unicondylar knee arthroplasty
- Independent flexion and extension gap-balancing provides uncompromising joint line control, ligament balancing, bone preservation and kinematic restoration
- Essential tibial cortical support is preserved with all aspects of instrument fixation

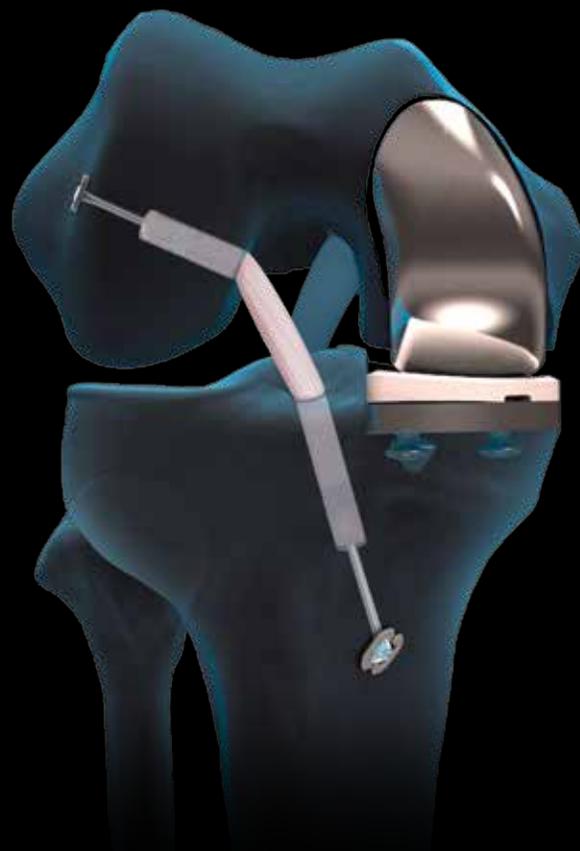

# Arthrex® BioPlasty™ Outpatient Knee Preservation

*iBalance® UKA and Concomitant Osteochondral and Ligament Reconstruction Treatment Options*

## *iBalance UKA with Osteochondral Resurfacing*

- Address osteochondral and trochlear lesions at the time of surgery with advanced biologic solutions
- Cartiform®\* cryopreserved, viable osteochondral allograft resurfacing for small to large lesions with minimal bony involvement
- ACP infused BioCartilage® extracellular matrix scaffold to augment marrow stimulation procedures in small contained lesions without bony involvement

## *iBalance UKA with Ligament Reconstruction*

- Proprietary RetroConstruction™ and FlipCutter® options provide ultimate control of socket location, graft placement and bone preservation
- TightRope® adjustable suspensory fixation options provide high strength\*\* while promoting maximum graft to tunnel engagement and incorporation
- Allograft GraftLink® presutured grafts provide a minimally invasive option to preserve the native tendons

\*Cartiform® is owned by Osiris Therapeutics, Inc.
